

Deep Patel

50 Stedman St, Lowell MA, 01851 • deep.patel4000@gmail.com • (978)715-7586

PROFESSIONAL SUMMARY

Curious and driven high school student with a strong interest in aerospace engineering and space exploration. Seeking opportunities to deepen my understanding of physics, engineering, and space science through hands-on learning, research, and collaboration. Committed to innovation, teamwork, and lifelong exploration of the unknown.

EDUCATION

Chelmsford High School, Chelmsford, MA

Expected Graduation: June, 2027

GPA: 3.95

Relevant Courses: Physics Honors, AP Computer Science, Pre-Calculus, Advanced Engineering Principles & 3D Design

SKILLS AND INTERESTS

Technical Skills: Java, CAD (Fusion 360, Revvit, Onshape), Robotics, Microsoft Office Suite, Mathematics Modeling, Physics Problem-Solving, Adobe Creative Cloud Suite

Interests: Aerospace Engineering, Astronomy, Astrophysics, Rocketry, 3D Modeling

ACADEMICS AND EXTRACURRICULARS

National Honor Society (NHS)

Mar 2026 - Present

Member

Artificial Intelligence (AI) Club

Sep 2025 - Present

Member

- Participate in collaborative discussions exploring new artificial intelligence technologies, industry trends, and practical use cases.
- Design and build hands-on projects with peers, integrating AI tools and concepts into various real-world applications.

Track and Field Team

Nov 2023 - Present

Student Athlete

- Compete in the high jump, 55m hurdles, and 110m hurdles, demonstrating discipline and athletic dedication through rigorous daily practices and competitive meets.
- Effectively balance a demanding academic schedule with team commitments, fostering strong sportsmanship and a continuous drive for personal improvement.

Robotics Club

Sep 2023 - Jun 2024

Member

- Collaborated with team members to design, construct, and rigorously test competitive robots for VEX Robotics tournaments.
- Applied engineering principles and mechanical problem-solving skills to iterate on robot designs and optimize performance for specific competition tasks.

WORK EXPERIENCE

Stash Proxies, Lowell MA

Jan 2021 - Jan 2022

Technical Operations Intern

- Assisted in maintaining and monitoring proxy server infrastructure to ensure consistent performance for over 500 monthly active users; conducted routine testing to validate IP performance, targeting accuracy, and server health across multiple locations
- Responded to basic customer support requests, helping resolve technical issues and ensuring user satisfaction

Dasbhav LLC, Lowell MA

Nov 2020 - Jan 2022

Fulfillment & Logistics Associate

- Managed high-volume daily fulfillment and shipping operations using standard logistics platforms, coordinating accurate packaging, labeling, pickups, and tracking to guarantee on-time delivery and customer satisfaction.
- Maintained organized inventory systems and generated replenishment reports to prevent supply disruptions, while actively identifying inefficiencies to develop and implement streamlined packaging procedures.

LEADERSHIP AND VOLUNTEERING

BAPS Bal Mandal, Lowell MA

Aug 2022 - Present

Youth Activities Coordinator

- Executed large-scale youth events with 1,000+ participants, fostering leadership, teamwork, and personal growth.
- Developed and implemented structured curricula for assemblies, incorporating interactive discussions, leadership exercises, and mentorship programs to instill cultural values, fostering personal and professional growth among youth.

BAPS Charities, Lowell MA

Jun. 2017 - Present

Volunteer

- Participated in a variety of service initiatives including health awareness events, community cleanups, and food drives
- Supported event logistics by assisting with setup, registration, and crowd coordination, contributing to smooth and impactful community service efforts

- Promoted civic engagement and wellness in local communities by helping coordinate outreach efforts and encourage volunteer participation

BAPS Akshardham, Robbinsville, NJ
Full-Time Volunteer

Jul. 2023 - Oct. 2023

- Managed digital fabrication workflows for a large-scale cultural project, designing intricate architectural elements using CorelDRAW and Adobe Illustrator, and generating precise CNC machine files.
- Operated and maintained industrial CNC cutting systems and hot wire machinery to accurately fabricate complex components from wood, PVC, and styrofoam.
- Collaborated with senior designers and volunteers to ensure strict design accuracy, maximize material efficiency, and guarantee timely project completion.
